Serenade® ASO

EPA Reg. No. 69592-12

SUPPLEMENTAL LABEL

For Use on Peaches (Includes use not previously printed on
Label Codes 18OE-002/18OK-002 and 18OE-001/18OK-001)

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

Crop	Disease	Rate Qts./A	Application Instructions
Peach	Bacterial Leaf Spot <i>Xanthomonas arboricola</i>	2 - 6	For control of Bacterial Leaf Spot, begin applications prior to disease development when environmental conditions and plant stage are conducive to rapid disease development. Repeat applications on a 7 to 10 day interval, or as needed. To improve plant surface coverage, add a non-phytotoxic adjuvant (such as Biotune® Adjuvant) to the spray tank. For improved performance, increase rates and reduce spray intervals, or use Serenade ASO in a tank mix or rotational spray program with other bactericides registered for control of Bacterial Leaf Spot. Serenade ASO may be applied up to and including the day of harvest.

See label attached to the container for First Aid, Precautionary Statements, Restrictions and Directions for Use.

This labeling must be in the possession of the user at the time of pesticide application.
