TECHNICAL INFORMATION BULLETIN  
FOR THE USE OF SERENADE® MAX  
TO CONTROL CITRUS BACTERIAL CANKER

**FIFRA Section 2(ee) Recommendation**

This recommendation is made as permitted by Section 2(ee) of FIFRA, as amended, and has not been approved by the U. S. Environmental Protection Agency.

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF FLORIDA

**SERENADE® MAX**  
EPA Reg. No. 69592-11

**DIRECTIONS FOR USE**

**It is a violation of Federal law to use this product in a manner inconsistent with its labeling.**

CROP	DISEASE	RATE lb/acre	USE RECOMMENDATIONS
Citrus Orange Grapefruit Lemon Tangerine Tangelo Pummelo and other citrus crops	<b>Bacterial Canker</b> <i>Xanthomonas</i> <i>axonopodis</i> pv. <i>citri</i>	1 - 3	Apply 1-3 pounds per acre of Serenade Max plus copper (at recommended label rates). Begin applications at the onset of flush on all citrus varieties, when environmental conditions are conducive to disease development. Repeat on 7 to 14 day intervals or as needed. The addition of the surfactant Biotune™ Adjuvant is recommended at 8-16 ounces per 100 gallons of water to improve performance.  Apply in sufficient spray volume to ensure thorough coverage. Use higher application rates and shorter spray intervals when conditions are conducive to rapid disease development or heavy disease pressure. Serenade MAX may be applied up to and including the day of harvest (0-day PHI).

**All applicable directions, restrictions and precautions on the EPA-registered label are to be followed.**

This FIFRA Section 2(ee) recommendation contains new or additional directions for use of this product, which may not appear on the package label. Read and carefully observe the cautionary statements plus all the other information appearing on the product label.

**This recommendation must be in the possession of the user at the time of pesticide application.**
