

REQUIEM

Crop Safety Chart for Leafy Vegetables

REQUIEM® 25EC insecticide, when used alone, is safe to use at label rates in all labelled crops. When using tank-mixtures or rotational programs, please refer to the following guide. If a product has been identified as a "Potential Risk," the potential for crop damage when combining or rotating that product with REQUIEM exists. Test any tank-mix or rotational combination in a small area before making applications to your crop area. A check mark (✓) means that REQUIEM is compatible with the product. Always read and follow label instructions.

| Product | Compatibility |
|-------------------|---------------|
| Acramite® 50WS | ✓ |
| Actara® 25WDG | Not Tested |
| Agri-Mek | ✓ |
| Aliette® 80WDG | ✓ |
