

## Features and benefits

- Features multi-site biochemical modes of action which destroy pathogens from inside out and offers growers an excellent resistance management strategy
- Excellent food safety ratings with 0-day PHIs and exempt from residue tolerance
- Provides high degree of worker safety with 4-hour REI
- Excellent tank-mix and rotational partner
- No CODEX restrictions for international sales of treated commodities
- OMRI Listed
- Can be used for conventional and organic production

Exercise control  
with SONATA®

## SONATA® – Proven Control of Mildew in Cucurbits

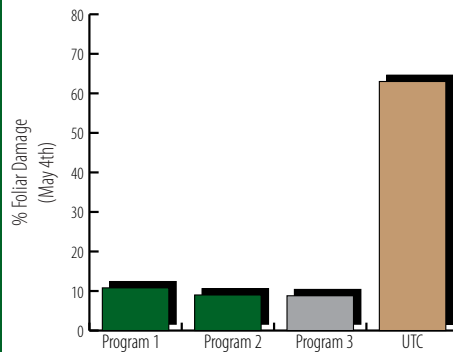

SONATA® delivers long-lasting downy and powdery mildew control with the added value of resistance management. By disrupting pathogen cell wall formation with a novel mode of action, the biochemical active ingredient in SONATA – derived from *Bacillus pumilus* – provides effective

control while extending the life of your chemical program. Unsurpassed in worker and food safety, SONATA offers a 4-hour Restricted Entry Interval and is exempt from residue tolerances. Add SONATA to your program today, and see what a difference biochemistry makes.

## SONATA for Downy and Powdery Mildew control

2 - 4 qt.  
per acre

Begin applications soon after emergence or transplant when environmental conditions and plant stage are conducive to disease development. Repeat on 7 to 14 day intervals or as needed. Use higher rates and short application intervals under heavy disease pressure.

Can be used for Conventional & Organic Production
