

## Features and benefits

- Features multi-site biochemical modes of action which destroy pathogens from inside out and offers growers an excellent resistance management strategy
- Excellent food safety ratings with 0-day PHIs and exempt from residue tolerance
- Provides high degree of worker safety with 4-hour REI
- Excellent tank-mix and rotational partner
- No CODEX restrictions for international sales of treated commodities
- OMRI Listed
- Can be used for conventional and organic production

Exercise control  
with SONATA®

# SONATA®

## SONATA® – Proven Control of Downy Mildew in Leafy Vegetables

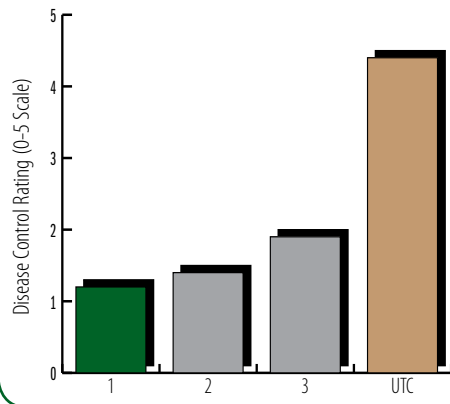

SONATA® delivers long-lasting Downy Mildew control with the added value of resistance management. By disrupting pathogen cell wall formation with a novel mode of action, the biochemical active ingredient in SONATA – derived from *Bacillus pumilus* – provides effective

control while extending the life of your chemical program. Unsurpassed in worker and food safety, SONATA offers a 4-hour Restricted Entry Interval and is exempt from residue tolerances. Add SONATA to your program today, and see what a difference biochemistry makes.

### SONATA VS. DOWNY MILDEW ON LETTUCE

S. Koike, Univ. of CA Cooperative Extension  
Salinas, CA - 2007

Programs:

- 1 - SONATA 2qt + Phosphite 2qt (C), Manex 1.6qt (A,B)
- 2 - Forum 6oz + Manex 1.6qt (A,B), Cabrio 16oz (C)
- 3 - Manex 1.2qt (A,B), Previcur 2qt (C)

Rating Scale:

0 = 100% Control      5 = No control

Timing:

A - July 12      B - July 26      C - August 6

## SONATA for Downy Mildew control

**2 - 4 qt.  
per acre**

Begin application when conditions are conducive to disease development and repeat on a 7 to 14 day interval or as needed. Use higher rates and shorter application intervals under heavy disease pressure. For improved performance, use SONATA in a tank-mix or rotational program with other registered fungicides.
