Some things
just work

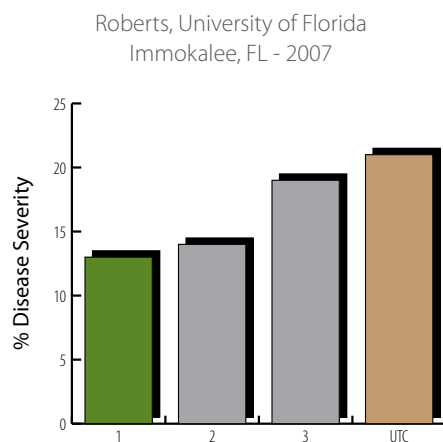

SERENADE® MAX – Proven Bacterial Spot Control of Tomatoes and Peppers

SERENADE® MAX is proven effective for battling bacterial spot, target spot and botrytis. Derived from *Bacillus subtilis* and powered by biochemicals called lipopeptides, SERENADE MAX has a complex, multi-site mode of action which destroys disease pathogens while also managing resistance.

Add SERENADE MAX to your disease control program for broad spectrum disease control, superior food and worker safety, and improved overall performance. Protect your crop with the proven power of biochemistry. SERENADE MAX - some things just work.

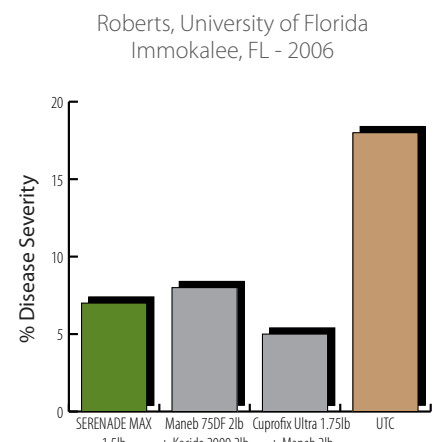

SERENADE MAX VS. BACTERIAL SPOT ON TOMATOES

- 1 - SERENADE MAX 1lb + Cuprofix Ultra 1.5lb
- 2 - Manzate Pro-Stick 2lb + Kocide 3000 2lb
- 3 - Cuprofix Ultra 1.25lb + Penncozeb75DF 2lb

SERENADE MAX for Bacterial and Target Spot

1 - 3 lb.
per acre

Begin application soon after emergence or transplant and when environmental conditions are conducive to disease development. Continue applications on a 5 to 7 day interval or as needed. When conditions are conducive to rapid disease development, for improved control, use SERENADE MAX in a tank-mix program with copper-based bactericides registered for control of bacterial spot at labeled rates.

Can be used for Conventional & Organic Production
